

FootPro™ Sandbox Tool

"It's like a grinder in your hands!"

Spencer Braswell, CJF of Texas demonstrates the use of the FootPro Sandbox Tool.

The FootPro™ Sandbox hoof and shoe finishing tool is now available. This is a nicely designed and well-built tool; most commonly used by competitors and for show horses.

Keep in mind the 10" expander wheel belts available through FPD dealers can be used with the FootPro™ Sandbox Tool. The 80 and 100 grit belts are zirconia, while the finer 180 and 220 grit belts are aluminum oxide.

JUST A REMINDER

Liberty Cu Nail, Sizes Available

SIZES AVAILABLE IN U.S. AND CANADA:

E-2 Slim and E-7 Slim

5 Combo Slim

5 Slim

LX-50, LX-55, LX-60, LX-65, LX-70

Here's what professional farrier Brad Paulk has to say about the Liberty Cu Copper Coated Horseshoe Nails:

"I have used other nails that have rusted in our environment here in Georgia. I have driven about 750 of the Liberty Cu 5 Combo Slim copper coated nails and after 5 weeks the Cu nails show no rust and I saw much less, or no, black around the nail holes. The nail holes are much cleaner and my customers love the way they look." - Brad Paulk, Griffith, Georgia

For more information on these nails, visit www.farrierproducts.com/liberty.html.

Bloom Forge Tools: An Industry Standard

Roy Bloom is recognized throughout the industry for the attention to detail and performance of the products he manufactures. Tools made by Bloom Forge come to you ready to work in your application. As a farrier, Roy understands the use of the tools.

As a Blacksmith, he understands the unique characteristics of the materials and stresses they endure in use. Bloom Forge offers the most extensive line of commercially available forging and shoeing tools in the North American market. Proudly made in the USA, Bloom Forge Tools are the best choice for the professional farrier.

Visit www.farrierproducts.com to view the complete line of Bloom Forge tools and find your nearest dealer.

SHOES FOR SUPPORT & EASE OF BREAKOVER

Everyone has horses that are either aged or have conformation issues – or both. These horses can be made more comfortable with the application of shoes that will support the limb, while making it easier for the horse to move. Kerckhaert has a wide range of styles for this purpose. While any number of flat shoes can be modified for the same purpose, these shoes make your job more efficient and effective. Check out our website at www.farrierproducts.com for more details.

KERCKHAERT ALUMINUM COMFORT

The Aluminum Comfort provides a good base of support with a good roll to the toe and toe quarters. Clipped only.

KERCKHAERT CENTURY SUPPORT

The Century Support has a similar design to the Aluminum Comfort with a bit less width in the toe, but great heel support and a slight rolled toe enhancement.

KERCKHAERT CLASSIC ROLLER

The Classic Roller is becoming the go-to front shoe for many farriers on the jumper circuit. Great support and a design that allows the horse to move forward and laterally with ease.

KERCKHAERT STEEL COMFORT

Same great design as the Aluminum Comfort in a steel version. Width of rolled toe provides nice protection for the front of the foot.

KERCKHAERT STEEL TRIUMPH

Available clipped or unclipped, this shoe has enhanced traction that is great for event horses, but allows ease of movement because of the beveled perimeter.

KERCKHAERT SX ROLLER

This unclipped version of the Classic Roller is made with a smaller section of steel, making it a great choice for Quarter Horses and general purpose use.
